

GERA Light board 100

Furniture designed with a timeless character has an intrinsic value. If we combine a pure fundamental idea and elegant materials with a responsible design, sustainable products are created, which will stand the stylistic test of time. The GERA light board 100 is the epitome of minimalism on a conceptual level. Technically it is ahead of its time with its fully integrated, electronic light control system. From an interior design point of view it is a variable programmable aide with solid furniture qualities for an individually adjustable living environment.
